

Micra Premium

HOMOGENEOUS FLOORCOVERING

VINYL

- > 30 colours - market's widest range
- > Subtle, non-directional design
- > PUR reinforced - Easy low cost maintenance
- > Favourable initial cost
- > No additional surface treatment needed

Micra Premium – the designer’s best friend

Micra Premium is a homogeneous, high-quality vinyl flooring suitable for most types of premises such as schools, offices, healthcare facilities and other types of public buildings. Micra Premium is PUR reinforced and will need no wax and no polish for life.

Looking at all the PUR reinforced vinyl floorings in the market, Micra Premium is a very good choice due to its high-quality properties and competitive price.

Widest colour range in the market

Micra Premium offers one of the market’s widest colour ranges – with a total of 30 inviting colours to choose from. This makes Micra Premium a favourite for designers who search for the perfect colour match, for almost any interior design setting. The colours are fresh and attractive, and the pattern is subtle and non-directional – in order to offer the best prerequisites for creating a modern and harmonious ambience. Micra Premium from Tarkett is unchallenged when it comes to creative freedom.

Tarkett Environmental Intelligence

We see our Intelligent Flooring Solutions as part of the world’s ecological system – and make strong efforts to secure that all our activities are based on respect for the environment. All our flooring products are developed, produced and handled with great concern for sustainability and the environment. We call it Environmental Intelligence and live by this principle in every single step, from vision to waste.

Environmental Intelligence in our vinyl flooring

Tarkett introduced the first vinyl flooring more than 60 years ago, and environmental sustainability has always been in focus for us.

- 100% recyclable
- Low energy consumption
- Easy and lowest maintenance cost
- Low emissions
- Long life cycle avoiding short-term replacement and minimizing old installation waste

PUR reinforced for an excellent life cycle cost

With Micra Premium you get a hardwearing vinyl flooring with a modern design, balanced raw material content and good maintenance properties. Micra Premium needs no additional surface treatment such as polish or wax when exposed to normal wear and tear. This will have a beneficiary effect on the life cycle cost.

Maintenance costs are crucial

Calculations show that the initial cost of buying and installing a flooring is about 8% of the total cost over the flooring's at least 20-year service life. That means cleaning and maintenance represent as much as 92% of the total cost. Although cleaning and maintenance costs are the largest item of expenditure in property management, and therefore very important for overall economy, they are

often overlooked in initial budgets. Analysing and providing the best conditions for the efficient care and maintenance of floors pays dividends. Choosing the right flooring, with the right cleaning properties, is therefore crucial for obtaining a good life cycle cost.

What pays in the long term?

A complete analysis of the total life cycle cost for different vinyl floorings shows that a low-price floorcovering, which requires regular treatment with polish, proves to be the most expensive choice over time. Micra Premium from Tarkett offers a perfect compromise if you have a limited initial budget and still want a PUR reinforced, high-quality function and an excellent life cycle cost.
